# Adopt-A-Tree

## Objectives:

- An improved environment and better quality of life. Trees combat pollutants, temper our climate via their evaporative powers, provide shade (which helps reduce our utility bills), muffle noise, hide ugliness, combat erosion, deflect wind, offer homes for wildlife, produce food and are esthetically pleasing.
- To supplement and accelerate planting and replacement of Town owned trees which have been lost for a variety of reasons including age, disease, accidents, and natural disasters.
  - ▶ Target A: Residential Areas where feasible, between curb and sidewalk.
  - ▶ Target B: Public properties, non-residential areas.

To promote care of trees by the donor/sponsor in early years following the suggestions on the Care Sheet which will be distributed with the planting of trees.

## Method:

- All trees are to be purchased and planted by the Town or its authorized agents.
  - ▶ Planting will be conducted under the supervision of the Department of Public Works.
  - ▶ All trees become the property of the Town.
- Donors may select the species of tree upon consultation with the Department of Public Works from its recommended list.
- Trees will be planted in some locations where trees have died and have been removed by the Town. In front of their properties in consultation with the DPW.
- Donors may make an unspecified location donation on other than in front of their own property.

## Recommended Tree Variety List:

1. Ginkgo (male)
2. Red Oak (the state tree)
3. Willow Oak
4. Little leaf Linden
5. Red Maple
6. Japanese Zelkova
7. Callery Pear
8. White Pine
9. Serbian Spruce
